## BAYSIDE COLLECTION

### MOVEMENT

Japanese solar chrono movement

### FEATURES

Date and 24-hour indicators

### CASE

Ø 45mm stainless steel case with fixed top ring

### STRAP

Integrated silicone or stainless steel bracelet

### WATER RESISTANT

100m / 330ft

### SCREW DOWN CASE BACK

### SCREW DOWN CROWN

With crown protector

### LUMINOUS

Hands and indexes with luminous

Bayside is no ordinary watch. It is a must-have for those who love the sea. And after notching up the title of most-sold collection ever, it is ready to take on the summer season with a new feature: the innovative chrono solar movement. A characteristic not to be underestimated, given that on a sunny day it takes only five hours (16 on cloudy days) to achieve a full charge which will last for four months. How does one keep an eye on charge levels? Just press the button on the right-hand side and check the counter in the middle of the dial. In addition, when the charge drops, to save energy the second-hand halves the number of “beats”, moving at two-second intervals instead of the usual one-second interval. Bayside is also about design, starting with the steel bracelet strap for those in search of a striking watch, or the silicone strap in black, navy blue and red, perfect for those whose calling card is sporty-chic. The dial is that of an elegant chronograph whose hallmark is its sophisticated detailing, including delicate lines that contrast with the bottom of the case, clearly marked indices and a shaded bezel that matches the strap.
